Houston, Texas 77029

**STORAGE & PROCESSORS SPCC  
PLAN  
Houston, Texas**

SNM2R provided environmental regulatory compliance services to the Storage and Processors facility that has been leased from the Port of Houston Authority at the Turning Basin Terminal. This task included the preparation of a Spill Prevention Control and Countermeasure (SPCC) plan.

SNM2R's services were initiated with a SPCC site assessment and document review. The scope of services included:

- Records review – reviewed previous plans and data available on past spill procedures, training procedures and records, discharge records, inspections records on site.
- Inventory – evaluated the amount of SPCC regulated products on site, including tanks associated with oil-filled equipment and generators
- Site Reconnaissance – the site was observed for drainage pathways, secondary containment and spill response equipment
- Interviews – interviews were conducted with persons familiar with the site and spill response procedures.
- Site Map – an updated site map was prepared used CAD to reflect the current site conditions as they pertain to SPCC regulations.

A final SPCC plan was provided to the client. The plan included required secondary containment calculations, spill prevention measures, spill countermeasures, training procedures, inspection procedures, agency notification procedures, updated spill logs, updated inspection logs, updated drainage logs, updated inspection checklists.
